#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 09 October 2001.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 and 9, drawn to analyzing a user's input and viewing logs, generating a program guide based upon the customer analysis, and then providing said customer analysis to an advertiser for a fee, classified in class 705, subclass 14.
  - II. Claims 2, 4, 6, 7, 10, 12, 14 and 15, drawn to providing the user with the choice between program guide that contains programs including advertisements and a program guide that contains programs without advertising, whereby the user is charged a fee for the programs that do not contain advertising, classified in class 705, subclass 14.
  - III. Claims 3, 5, 11 and 13, drawn to transmitting a personalized program guide to a user, allowing a user to elect to record a program in the guide for a fee, classified in class 725, subclass 47.
  - IV. Claims 8 and 16, drawn to charging advertisers for placing advertisements in a program guide that containing information associated with the listed programs, classified in class 705, subclass 14.

2. The inventions are distinct, each from the other because of the following reasons:

The Inventions in group I, group II, group III, and group IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, the inventions in groups I, II, III, and IV are disclosed as part of an electronic programming guide. However, the subcombination of group I is directed towards a method for selling user information to an advertiser for a fee. The subcombinations of groups II, III, and IV will operate as disclosed regardless of whether the advertiser pays for user information. The subcombination of group II is directed towards allowing customers to choose between programs in a program guide that contain advertisements and, for a fee, programs that do not contain advertisements. The operation of the subcombinations disclosed in groups I, III, and IV will operate as claimed regardless of whether a user is charged a fee for watching programs that do not contain any advertisements. The subcombination of group III is directed towards charging a fee for watching a program regardless of whether said program has advertisements. The operation of groups I, II, and IV will operate as disclosed regardless of whether a fee is charged for the program itself. Finally the subcombination of group IV is directed towards advertisements placed in a program

Art Unit: 3622

guide. The operation of groups I, II, and III will operate as disclosed regardless of whether the guide itself contains advertisements. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

### **Conclusion**

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
